

61  
SUB  
F1

21. (Amended Twice) A method of inhibiting in a mammal a dermal allergen-induced inflammatory response comprising administering to the mammal a therapeutically effective amount of lactoferrin product, said amount being sufficient to reduce inflammation-induced Langerhans cell migration or accumulation of dendritic cells in lymph nodes.

Please add the following new claims.

62

26. The method of claim 5, wherein the allergen-induced inflammatory disorder is contact dermatitis.

27. The method of claim 21, wherein the dermal allergen-induced inflammatory response is manifested as a contact dermatitis.

28. The method of claim 5, wherein the allergen-induced inflammatory disorder is psoriasis.

29. The method of claim 21, wherein the dermal allergen-induced inflammatory response is manifested as psoriasis.

Please cancel claims 12-14, 22 and 25 without prejudice or acquiescence.
